

Juncture, A Collection Of Original Papers

REVIEWS

clarify Janssen's general point that inter-reference cannot be predicted by the grammar alone.

I shall just briefly mention the remaining papers. There is a detailed description of the French article system by Winkelmann and a comparison of the English, Hebrew and Russian articles by Raskin. Hawkins gives his familiar generative semantic arguments that certain English definite articles must originate as deep-structure indefinites. Tabakowska argues that the choice of the head noun phrase determiner of restrictive relative clauses is to a large extent dependent on the presuppositions carried by the utterance in which it occurs. The papers by Swiggers and Parret are more general theoretical discussions of reference and indexicality. There is a paper on quantifier floating in German by Vater and on NP modifiers in English by Rieger.

The book is well laid out and contains few typographical errors but the mixed quality of the contributions makes it a book to borrow rather than to buy. It is a reminder that working papers are normally the best vehicle for the rapid distribution of conference papers.
